

QUESTION:

A digital enthusiast Alex, is in search of an record saved on his website. He wants them urgently to present in a meeting. Can you help him to find it?

SOLUTION:

- Alex website's : "whitehatians.tech"
- Now check the DNS records of the websites , check the records such as A,AAAA,TXT,mx,DS etc..
- you will get the flag on **TXT** records

The screenshot shows the Google Admin Toolbox Dig interface. At the top, there's a green header with a menu icon, "Google Admin Toolbox Dig", and a "Help" link. Below the header, the "Name" field is set to "whitehatians.tech". A row of tabs for different record types is displayed: A, AAAA, ANY, CAA, CNAME, DNSKEY, DS, MX, NS, PTR, SOA, SRV, TLSA, TSIG, and TXT. The "TXT" tab is selected and highlighted in green. Below the tabs, the DNS record details are shown: "TTL: 5 minutes" and "TXT VALUE: \"BFF{OnceUponATimeInALandFarAway}\"".

Enter the value in the flag Section

Flag: BFF{OnceUponATimeInALandFarAway}
