**Question :**

• One of the cell in the Excel sheet has some hidden text in it. Can you find it and solve the flag ? Look from **A143 to Y143**

**Hint :**

• The Easiest Password ever

Solution:

• The challenge name is "**The Invisible Cell**" where one of the excel cells have a clue for finding the flag.

• First of all you have to **download** the excel sheet given in the specific challenge tab.

• Open the excel sheet and look from cells **A143 to Y143** which represents the **hex value** and the cell **Y143** has a **small arrow figure**, just click on it.

• The hint reads, "**The Easiest Password ever**".

• Click "Unprotect Sheet" and enter the password as "password"

• Now, the cell's text is visible. Follow the instruction

• Then you have to copy the hex value in each cell and paste it in a **online or offline hex decoder**, as per the text in the cell

•

- The above screenshot shows the hex values pasted with delimiter space.
-

- After pasting the hex value, click on "**hex decode**" option to obtain the flag.
- The below screenshot displays the required flag......... Happy capturing.
-

- Flag: BFF{exc3l_1s_d0p3}
